

# Curbside Appointments

Keeping care safe.

**Please do not walk in.** In order to keep everyone safe, we ask that you wait in your car. Give us a call to alert us that you are here, and one of our team will come out to your car as soon as possible. Please have dogs on leashes and cats in carriers if possible. We will take your pet directly to their private exam room, where they will receive the same high level of care they always do. Once their visit is complete, we will bring them back to you and will call you to discuss results and any necessary treatment.

You and your pet's safety mean everything to us.  
Because here, you are family.
